View on Springer. The pudendal nerve starts from mainly the third sacral root in the presacral area, then enters the gluteal region around the sacrospinous ligament, and then goes through the pudendal tunnel in the fascia of the internal obturator muscle which has been resected here In the seated position on cadavers we can see the ascension of the ischio-rectal fat tissue which leads to compression of the nerve trunk at the 3 levels mentioned above Fig.

There is, however, clear evidence of the high quality of the services rendered. The contributions are written by specialists in the given fields and constitute the first part of each volume. FAQ Policy. Each lesion is of 60 seconds duration [19, 21, 24-26]. Most of these patients had cancer pain.
