At one time, scholars such as Ludwig von Mises might have wanted to isolate bureaucracy as a phenomenon that thrives only in the public sector, in government, but the evidence suggests that it is precisely in the technostructure described by Galbraith that the public and private sectors Representative Bureaucracy (Classics of the Social Sciences) to share an overlapping fate, as large firms in the private sector attempt to manage their environment and as the government increasingly executes the laws by means of the technostructure within private firms. Such criteria as experience or training as a condition of public employment, the separation of office and incumbent, the strict exclusion of familial ties, and administrative work as a full-time occupation are clearly applicable in the communist countries. Der Staat -
